About Sensacare

Sensacare is an intelligent, clinically aligned Remote Patient Monitoring (RPM) platform designed to empower healthcare providers with real-time health insights, automated care coordination, and Medicare-aligned care planning. Built for the unique needs of GPs, pharmacies, aged care providers, allied health teams, remote care networks, and independent seniors, Sensacare delivers a simple yet powerful system to streamline proactive care, improve outcomes, and reduce unnecessary hospitalisations.

At its core, Sensacare brings together vital sign monitoring, smart alerting, care plan automation, and integrated telehealth—ensuring every client receives timely, personalised care based on real data. Whether you're managing chronic disease in general practice, supporting aged clients at home, or coordinating care across remote or NDIS settings, Sensacare is designed to fit seamlessly into your workflow.

Join the Pilot Program

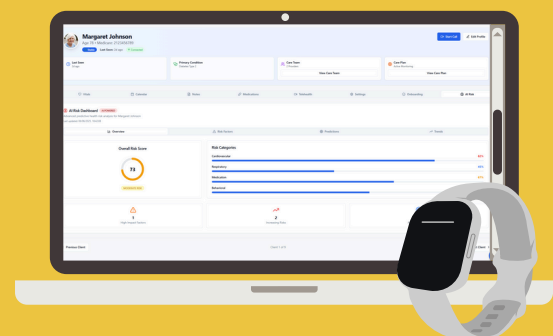

The Sensacare Pilot Program offers eligible healthcare providers the opportunity to trial our advanced Remote Patient Monitoring (RPM) platform for 1 month.

Designed for proactive, nurse-supported care, the program includes full software access, smart device integration, and optional clinical oversight all with no upfront commitment. It's your chance to see how Sensacare fits into your workflow, improves patient outcomes, and supports Medicare-backed billing models.

Who It's For

- **GPs & Medical Centres:** Automate care plan workflows, improve CDMF documentation, enable at-home vitals tracking
- **Pharmacies:** Offer value-added health services using patient-owned devices and Sensacare dashboards
- **Aged Care & NDIS Providers:** Monitor clients at home, triage alerts, and deliver better care with fewer visits
- **Allied Health Teams:** Track client progress and coordinate interventions across disciplines
- **Remote & Rural Services:** Deliver high-quality care to hard-to-reach clients with nurse-led RPM models
- **Independent Seniors:** Stay connected, stay monitored, and stay independent—with clinical oversight on demand

Sensacare's Tiered Pricing with No Upfront Fees

Sensacare makes it easy to get started with remote patient monitoring — no upfront fees, no barriers. Our flexible, tiered pricing adapts to your needs, whether you're a solo clinician, aged care provider, or part of a multidisciplinary team. Choose the level of support that suits you, scale when you're ready, and pay only for what you use.

- Tailored to Your Setting – Flexible pricing by provider type (GPs, pharmacies, NDIS, aged care) and delivery model: choose software only, BYOD integration, or full-service bundles with devices and nurse support.
- No Upfront Barriers – Start with low-risk pilots and no setup costs. Only pay monthly for what you use.
- Transparent, Scalable Pricing – Clear monthly fees for software, nurse services, and device bundles, with tiered discounts as your user base grows.

What Sets Us Apart

Feature	Sensacare	Other RPM Providers
Real-time Clinical Oversight	✓ Ai + RN Oversight	⚠ Often Passive Dashboards
Device Agnostic	✓ BYOD or use Ours	⚠ Locked ecosystems
Custom Alert Thresholds	✓ Yes	✗ Preset Only
CDMP Revenue Alignment	✓ Billing, Reporting, Monitoring, Goals	✗ Manual burden
Human Triage	✓ RN Oversight	⚠ Algorithm Only
NDIS + Aged Care Ready	✓ Funding, Reporting, Safety, Access	⚠ Not Always Compliant
Modern Design	✓ User Friendly	⚠ Often Outdated
Tiered Pricing with Zero Upfront	✓ Flexible, Low-Risk, Scalable	⚠ Expensive Entry Costs
